Abstract (en)

[origin: WO2016055325A1] The invention relates to a method for coating a workpiece by using a spraying device. The coating of the workpiece is performed according to at least one coating parameter and at least the following steps are performed during the coating: sensing a locational heat distribution in a working area of a surface of the workpiece; and adjusting the at least one coating parameter in accordance with the sensed heat distribution. The invention further relates to a device for coating a workpiece.
