Abstract (en)  
[origin: WO2016020401A1] The invention relates to a device for anchorage in the ground. Said device for anchorage in the ground (10) comprises at least, - one rod (2), - one drill bit (4), attached to a first end part of the rod (16). The device is characterized in that it comprises a peelable film (6), attached on an external part (8) of the rod (2), said film (6) being capable of detaching from said external part (8) under the effect of friction between the rod (2) and the surroundings thereof.
