Abstract (en)  
[origin: WO2016020124A1] The invention relates to an expansion joint bridge for a joint on a floor surface, comprising a first joint edge profile and a second joint edge profile which are joined to one another by means of an elastic joining profile provided with a transverse leg that covers at least part of the joint in the mounted state; the outer edges of the transverse leg that face the first and second joint edge profiles are covered in the transverse direction by transverse flanges formed on the first and second joint edge profiles.
