Abstract (en)  
[origin: WO2016020018A1] The disclosure relates to a transportable container (12) for accommodating function modules (48, 50, 52, 54), in particular function modules (48, 50, 52, 54) for water supply, and a function arrangement (10). The function arrangement (10) has a fastening system (58) for transportable containers (12) for accommodating function modules (48, 50, 52, 54), wherein the fastening system (58) has at least one accommodation rail (68) extending at least sectionally in a longitudinal direction, and a tube profile arrangement (60), wherein the at least one accommodation rail (68) is assigned to a container wall (14, 16, 18, 20) and provides an undercut accommodation profile (92), wherein the tube profile arrangement (60) comprises at least one tube profile section (62, 64) which can be coupled to the at least one accommodation rail (68) by means of at least one fastening element (70), wherein the tube profile arrangement (60) is formed at least sectionally as a media guide for fluids, and wherein the function arrangement (10) additionally comprises at least one function module (48, 50, 52, 54) which can be accommodated by means of at least one coupling piece (74) on the at least one tube profile section (62, 64), wherein the at least one tube profile section (62, 64) is arranged in the assembled state between the accommodation rail (68) and the function module (48, 50, 52, 54).
