Abstract (en)

[origin: WO2016045992A1] The invention relates to a method for generating energy, in which an electropositive metal selected from the alkali metals, the alkaline earth metals, aluminium and zinc, as well as mixtures and/or alloys thereof, is atomised and/or sprayed and is combusted with a reaction gas comprising carbon dioxide and/or water, the reacted mixture of reaction gas and electropositive metal being mixed with water and/or an aqueous solution and/or suspension of a salt of said electropositive metal. The invention also relates to a device for carrying out said method.
