Abstract (en)  
The invention is based on the idea that an underplate (7) can be firmly installed, unsupported by a lever handle or a turn knob, and the installation is quick. The cover plate arrangement according to the invention comprises a screw-mountable underplate (7) and a cover plate (1) to be fitted thereon. The cover plate comprises a front plate (2) and a lateral portion (3). The lateral portion of the cover plate comprises an inward-projecting wing (9) at the edge (10A) of the lateral portion opposite to the edge (10B) between the front plate and the lateral portion. A lateral groove (11) is left between the inner wing and the front plate. An edge (17) of the underplate can be turned into the lateral groove (11).
