Abstract (en)

A hermetically sealed container, particularly a mechanical closure jar for food products or the like, comprising a containing part (2) and a lid (4) insertable into the mouth of the containing part with the interposition of sealing means, characterized in that said sealing means comprise a closing member (10) applicable, in a removable way, to the mouth of the containing part (2), having a diaphragm wall (12) which limits the volume inside the containing part (2) and an annular wall (14) adapted to exert a sealing action for the hermetic closure of the container, in a position interposed between the side wall of the containing part and the lid when inserted into the mouth of the containing part.
