Abstract (en)
[origin: CN106884243A] The invention discloses a warping machine (1) that comprises a warping drum (2) with a rolling area, a thread guider (7) and a control device (11), wherein, the control device controls the movement between the warping drum (2) and the thread guider (7) relatively. A warping machine with high production is desired, therefore, an image shooting device (12), which is directed at least on a part of the rolling area, is connected with the control device (11), and rolling (21) is performed on the rolling area when the warping machine operates.
