Abstract (en)

[origin: EP3181837A1] The cam follower roller device for a pump piston of a fuel injection pump comprises a tappet body 12, a pin 14 mounted on said tapped body and a roller 16 mounted on said pin. The tappet body 12 comprises separate first and second parts 18, 20, the first part 18 supporting the pin 14 and the second part 20 delimiting an abutment surface 28 for the pump piston. The device further comprises at least one deformable coupling member 22 interposed between said first and second parts 18, 20 of the tappet body to couple together said parts.
