Abstract (en)
A vehicle lamp (1) includes a light source (10) configured to radiate white light, a light concentrator (20) configured to concentrate light radiated from the light source (10), a reflection pattern formation device (30) configured to have a plurality of optical elements arrayed in a matrix shape and form a reflection pattern by reflecting light concentrated by the light concentrator (20) according to a collective reflection plane (33) formed by a plurality of optical elements, and a projection optical system (50) configured to radiate the reflection pattern in a forward direction, wherein the collective reflection plane (33) is positioned inside a light concentration spot (SP) of the light concentrator (20) in the collective reflection plane (33).
