Abstract (en)
[origin: EP3182518A1] The invention refers to an electrical connector for connecting an electrical conductor with an electrical contact of a printed circuit board, with a first contact element for connecting the electrical conductor with the connector, with a second contact element for connecting the electrical contact of the printed circuit board with the connector, wherein the first contact element and the second contact element are connected by a connecting element, wherein the first contact element is embodied as an isolation displacement contact, and wherein the second contact element is embodied as contact pin.
