Abstract (en)  
[origin: WO2016027036A1] The invention relates to a contacting device (10) comprising vertical linear elements (12) and spacers attached to the linear elements (12) so as to separate them. The spacers include distance pieces (14), each one comprising: i) segments (14.1, 14.2) that are oblique in relation to the linear elements (12); and ii) a connection area (16) between the oblique segments (14.1, 14.2) such that each of the oblique segments (14.1, 14.2) descends from a respective connection area (16) towards a respective linear element (12).
