Abstract (en)

[origin: WO2016028773A1] The present disclosure is related to a system and a method for varying search results of a user-based networking application. In one example, the disclosure includes a method that includes operations such as accessing from a processing element a results list responsive to an inquiry, determining by the processing element a population density corresponding to a selected location; and based on the population density, varying by the processing element one or more parameters of the results list for displaying on a user device.
