Abstract (en)

[origin: WO2016026866A1] The invention concerns a method for monitoring the treatment of mobile patient support devices. The infection status of a mobile patient support device is registered in a database in a computer system. The mobile patient support device is identified at a treatment station using a data reader which identifies an identification tag attached to the mobile patient support device. Information on the infection status of the mobile patient support device is output at the treatment station.
