Abstract (en)

[origin: CA2956549A1] The invention relates to a contact element (100) for plug connectors (200), comprising plug contacts (112) arranged on the plug side and a crimp connection (132, 134) arranged on the cable connection side, and comprising at least one primary locking element and at least one secondary locking element, characterised in that: the plug contacts (112) and the crimp connection (132, 134) are offset from one another in an axially parallel manner; the at least one primary locking element has two locking springs (112) which act transversely in relation to the plugging direction (R), and which are mirror-symmetrically arranged in relation to a plugging means plane (E); and the at least one secondary locking element is arranged in the contact element (100) in a mirror-symmetric manner in relation to the plugging means plane (E), and has at least one secondary locking recess (124) running transversely in relation to the plugging direction.
