Abstract (en)

To achieve both of wind direction control by a louver and adjustment of a feeling of draft, while maintaining a level of comfort. Provided is a control device (50) for an air conditioner, the air conditioner including: an outlet for conditioned air; a louver that is pivotally provided at the outlet; an anti draft function that is pivotable between a withdrawn position flush with the panel body and a louver-direction position facing the conditioned air blown out from the outlet; and a pivot mechanism that causes the anti draft function to pivot between the two positions, the control device including a control unit (52) that causes the anti draft function to move to a position where the conditioned air blown out from the louver is not blocked, depending on an operation state of the air conditioner, and inactivates the anti draft function.
