Abstract (en)

[origin: EP3185033A1] The invention pertains to an apparatus (200) comprising: a connector (232) for connecting a cable (250), configured so as to provide power to a room lamp (430) in accordance with a desired room lamp status; and a transmitter module (212, 222) configured to generate an electromagnetic signal in the ultrasonic frequency range, the electromagnetic signal having a beacon message encoded therein; wherein the transmitter module (212, 222) is operatively connected to the connector (232), so as to allow transmission of the electromagnetic signal over the cable (250). The invention also pertains to a corresponding system and room lamp unit.
