Abstract (en)
[origin: US2017176944A1] The invention relates to an applique intended to be affixed to a timepiece dial, comprising at least one foot portion having a first end attached to the applique and a second, free end, the foot portion being arranged to be capable of insertion into a hole provided in the dial. According to the invention, said foot portion comprises, on the side of the free end thereof, a plastically deformable area arranged to form, after deformation, once the foot portion is inserted into the hole in the dial, at least one locking area of the foot portion on the dial.
