Abstract (en)

[origin: WO2016030633A1] The invention relates to a comfort system for an animal husbandry enclosure, comprising at least one comfort mattress (2). Said at least one comfort mattress (2) is provided with stimulation means (3) for generating a stimulus which will be detected by an animal resting on the upper surface (6). Said comfort system also comprises remote control means (4) that are connected to stimulation means (4) fitted to said at least one comfort mattress (2), for the control of said stimulation means between active/inactive configurations.
