Abstract (en)

[origin: WO2016032769A2] An article of footwear may include an upper and a sole structure secured to the upper. The upper has a knitted component formed of unitary knit construction that includes at least one gore region located in a heel region of the article of footwear. The gore region provides a contoured configuration to the knitted component. In a method of manufacturing, a knitted component may include a first gore region and a plurality of second gore regions, with the first gore region being located in a heel area of the article of footwear and the second gore regions being located adjacent to the sole structure.
