Abstract (en)
[origin: WO2016030188A1] The invention relates to an antiperspirant cosmetic containing at least one specific design protein and which is exempt of aluminum and/or zirconium halides and/or hydroxy halides. The invention further relates to the use of a specific protein and to a non-therapeutic method for reducing body perspiration. Adding or using said at least one specific protein ensures that the sweat gland(s) is/are effectively influenced, thus resulting in a significant reduction in axillary hyperhidrosis even in the absence of antiperspirant aluminum salts.
