Abstract (en)
[origin: WO2016020719A1] The present invention relates to novel injectable microcamers, made of collagen or cross-linked collagen, especially equine collagen, said microcamers having the form of agglomerates of filamentous collagen elements and having specific size. The invention also relates to a process for the preparation of said Microcamers, cell cultures comprising said microcamers and the use thereof for implanting cells in a mammal body.
