Abstract (en)
[origin: WO2016030044A1] The invention relates to an antiperspirant cosmetic containing at least one specific protein from human or animal sources or from fish or birds or eggs and which is exempt of aluminum and/or zirconium halides and/or hydroxy halides and Bovine serum albumin (BSA). The invention further relates to the use of a specific protein and to a non-therapeutic method for reducing body perspiration. Adding or using said at least one specific protein ensures that the sweat gland(s) is/are effectively influenced, thus resulting in a significant reduction in axillary hyperhidrosis even in the absence of antiperspirant aluminum salts.
