Abstract (en)

[origin: WO2016030174A1] The invention relates to a method for producing a separation net and a separation net (10), in particular for vehicle interiors, having a net-like, tear-resistant textile web (11) formed of textile threads (12), which is cut into any peripheral contour, wherein the loose ends (13) of the textile threads (12), which were created by a separating cut, are securely enclosed at the edges in a plastic material of a single-layered edge strip (18). The textile web (11) can have any peripheral contour and the loose ends (13) of the textile threads (12) of the textile web (11), which were created by a cut, are embedded at least at the side edges (16, 17).
