Abstract (en)  
[origin: CA2957992A1] The invention relates to a linear textile structure, comprising at least two strands (1, 2), wherein a first strand (1) has microfibers and a second strand (2) encloses the first strand (1). With regard to the problem of providing a stable linear textile structure, by which the most effective cleaning possible can be achieved with minimum effort, said linear textile structure is characterized in that both strands (1, 2) can be brought into contact together at least in some sections and simultaneously with a surface to be cleaned.
