Abstract (en)

[origin: WO2016030617A1] The invention relates to a household electrical appliance comprising a steam-generating base (1) and an ironing and/or smoothing device (3) connected together by a cord (2), said base (1) being supplied with electricity by a cable (4) intended for being connected to a domestic grid, the cable (4) comprising one end provided with a connector (41) making it possible to connect the cable (4) electrically to a connector (12) with a complementary shape supported by the base (1) and accessible from the outside of the base (1), characterised in that said connector (12) with complementary shape is arranged at the bottom of a recess (13) made on a lower surface (11) of the base (1), the lower surface (11) comprising a groove (14) in which the cable (4) is positioned when the cable (4) is connected to the base (1), said groove (14) comprising means (14A, 14B) for holding the cable (4) and maintaining same in the groove (14).
