Abstract (en)

[origin: WO2016030618A1] The invention relates to an electrical appliance for domestic use, which includes a housing (1) comprising an opening (5) through which a cord (2) containing at least one electric wire (20) passes, the opening (5) receiving a protection element (6) secured to the cord (2) which extends around the cord (2) in order to protect the cord (2) locally against wear associated with bending and/or friction, characterised in that said protection element (6) supports a connector (62) making it possible to connect the wire (20) electrically to a connector (70) with a complementary shape arranged in the housing (1) when the protection element (6) is placed in the opening (5).
