Abstract (en)

[origin: EP3187267A1] The present invention provides an overhead shower head, which needn't a wrench when assembled and disassembled, the overhead shower head comprises a shower head main body (1) and a universal ball (2) disposed in a ball fixing seat (11) at the rear side of the shower head main body (1); wherein an abutting fitting portion is disposed between the universal ball (2) and the ball fixing seat (11), when the universal ball (2) and the ball fixing seat (11) rotate relatively, the abutting fitting portion abuts in the rotating direction, so that the universal ball (2) and the ball fixing seat (11) rotate together. The assembly and disassembly of the overhead shower head of the present invention can be achieved by just rotating the shower head main body (1) without using tools such as a wrench, the assembly is fast and convenient.
