Abstract (en)

The invention relates to a dispensing device, especially for cosmetic product, comprising a dispensing member (12), an actuator (10) configured to actuate the dispensing member (12) when the actuator (10) is pressed, a collar (14) able to maintain the dispensing member (13) on a reservoir (2), the dispensing device further comprising a jacket sleeve (15) assembled on the collar (14), the sleeve (15) and the collar (14) being assembled by fitting shapes arranged on the collar (14) and on the sleeve (15), said fitting shapes forming angular abutments, said fitting shapes either of the collar (14) or of the sleeve (15) being obtained by creep welding.
