Abstract (en)  
The invention relates to a laundry treating machine (100) comprising (105) provided with a laundry loading opening (115) for accessing a laundry treatment chamber (110) and a loading door (125) hinged to the cabinet for selectively closing or opening the laundry loading opening, the cabinet (105) further comprising a swivelling door (140) hinged to the cabinet and openable to allow access to an inner region of the machine within the cabinet, a closure mechanism being provided to keep the swivelling door closed when the swivelling door is abutted against the cabinet (105), characterized in that the closure mechanism comprises at least a magnet (170) located either at the swivelling door or at the cabinet, and wherein, when said swivelling door (140) is kept in abutment against said cabinet by the magnetic force of said at least a magnet (170), a spacing is present between said magnet (170) and a surface either of said cabinet (105) or of said swivelling door, so that said magnet does not contact said cabinet or the swivelling door, respectively, and said swivelling door remains closed on said cabinet due to magnetic attraction.
