Abstract (en)  
[origin: WO2016034784A1] The subject of the invention is a surfboard fin, having a main body (12) which comprises a first edge (20) in contact with the board when said fin is fixed to the board, a leading edge (22) at the front and a trailing edge (26) at the rear, a rear curvature connecting the leading edge (22) and the trailing edge (26), the trailing edge (26) comprising a forwardmost tip (31), characterized in that the main body (12) is extended towards the rear by an arm (14) which extends from a straight line perpendicular to the first edge (20) and passing through the tip of the trailing edge (26) as far as the rear curvature, said arm (14) having a length greater than about 8 cm.
