Abstract (en)
[origin: WO2016034224A1] The present invention relates to a laundry washing and/or drying machine comprising a front door glass locking mechanism mechanically improved to withstand axial, transverse as well as radial forces. The present invention more particularly relates to a laundry washing and/or drying machine (1) comprising a front door (2) allowing access into a drum of the appliance through a front door opening (3) and being hinge-connected to the appliance body to be lockable during operation of the laundry washing and/or drying machine (1), the front door (2) further comprising a front door glass (4) secured onto an inner ring (5).
