Abstract (en)

[origin: WO2016037203A1] A dismantlable and portable device for supporting and holding slacklines (1), consisting of a line support (2) with carriers (3) placed in an A shape and with a line holder device (4) arranged in the longitudinal direction (1') of the slackline (1), wherein the carriers (3) of the line support (2) are arranged intersecting each other, the carriers (3) are connected at their intersection point (6) by a connection element (21) guided through adjustment openings (27), and, at this intersection point (6), a line-bearing part (7) is arranged with two vertically downwardly facing flanges (8) and a plane, horizontal line-bearing surface (9) which on diagonally opposite sides respectively has a carrier bearing surface (10) in the longitudinal direction (1') of the slackline (1) and a carrier abutment surface (11) transverse to the longitudinal direction (1') of the slackline (1), and the carriers (3) of the line support (2) are connected to a crosspiece (14) via ground-side openings (12) through which connection elements (21) are guided.
