Abstract (en)  
[origin: WO2016039706A1] The present invention relates to a side rear-view mirror assembly (1), which eliminates the blind spots on the right and left of the vehicle, and which essentially comprises at least one body (2) which remains fixed when the vehicle is being parked or shifted to reverse gear, at least one fixed mirror (3) which is located on the body (2), at least one support mirror (4) which is integrated in the body (2) and which is automatically opened radially when the vehicle is being parked or shifted to reverse gear, at least one illumination element (5) which is positioned on the support mirror (4) and which particularly facilitates night vision by projecting light on the ground where the vehicle is located.
