Abstract (en)
[origin: TW201610249A] The invention relates to a rotating plate of a spinning machine, in particular a drawframe or carding machine, for depositing a fiber band in a can, comprising a base body (2) and a sliver channel (3) arranged in the base body (2). According to the invention, it is proposed that, for the intended use of the rotating plate (1), the side of the rotating plate (1) facing the can has at least partially a coating (6) with a spatial structure of spherical, irregular elevations (11).
