Abstract (en)

[origin: EP2995624A1] The invention is in the domain of delivery of molecules to brain cells across the blood-brain barrier. The invention relates to a novel polypeptide-based carrier that allows the efficient delivery of an effector peptide, to neuron cells across the blood-brain barrier, and to methods for the production and testing of such carrier, including a model for testing the capacity of such molecule to cross the blood-brain barrier and / or the toxicity of molecules on the blood brain barrier and/or the capacity of molecules that have crossed to target human brain cells (e.g. neurons, astrocytes and microglial cells).
