Abstract (en)
[origin: WO2016037849A1] The invention generally relates to an assembly (1) comprising a component (2) and an anchor plate (4) which can be at least partly concreted into a concrete component (3). The anchor plate (4) has at least one anchoring element which can be concreted into the concrete component (3) in order to transfer transverse forces (5). Furthermore, the anchor plate (4) is releasably connected to the component (2) by means of at least one screw connection (6), and the screw connection (6) comprises at least one screw (7) and a nut (8) with a protective cap (9). The invention is characterized in that the protective cap (9) is designed as a cap which can be plugged onto the nut (8) and concreted into the concrete. The outside (10) of the protective cap (9) has an outer anti-rotation element (11) and the inside (12) has an inner anti-rotation element (13).
