Abstract (en)
[origin: WO2016037857A1] The invention relates to a refrigeration appliance with two side walls defining a storage chamber and two primary guide rails (9) for drawers, said guide rails extending respectively adjacent to one of the side walls. Said refrigeration device comprises an adapter element (2) which can be secured to one of the primary guide rails (9) and a secondary guide rail (19) for a drawer, which extends in the fixed state, parallel to the primary guide rails (9) between the primary guide rails (9).
