Abstract (en)
[origin: WO2016037860A1] A domestic refrigeration device (1) having an internal space (4, 5) for receiving foodstuffs, which is bounded by walls of an internal container (3), and with a storage container (8) for foodstuffs that is arranged in the internal space (4, 5) and can be closed with a lid (9), and with a mounting device (12) with which the lid (9) is mounted in the internal space (4, 5) such that it can be raised and lowered for opening and closing the food storage container (8), and with a control element (13) by means of which the lid (9) can be actuated, wherein the control element (13) for actuating the lid (9) can be actuated along an actuation path and the lid (9) can be positioned, in dependence on a position of the control element (13), in a first closed position and at least in a second fully open position, wherein the control element (13) itself has a display unit (28) for displaying symbolic information depending on the position of the lid (9).
