Abstract (en)

[origin: WO2016037675A1] The invention relates to a support (10) for a sensor element (11). Said support (10) is provided for potting and in particular manufacturing a rotational speed sensor and comprises an at least partly hollow main member for accommodating electric contacts and potting compound. According to the invention, a cover (25) is provided for covering and filling a cavity in the main member.
