Abstract (en)

[origin: WO2016038165A1] The invention relates to a hearing instrument (1) comprising a signal processing unit (4) and a power supply device (15). The power supply device (15) comprises power supply electronics (28) and a power supply means (27) that is rechargeable in an appropriate operating mode. The hearing instrument (1) further comprises a switching means (11, 24) designed to be put in at least two switched states. The power supply electronics (15) are designed to control an OFF state of the hearing instrument (1) in accordance with the switched state of the switching means (11, 24).
