Abstract (en)
[origin: US2017202354A1] The invention relates to seating/reclining furniture, in particular an armchair or a chair, having a back part, a seat part and an adjustable footrest arrangement that is pivotable relative to the seat part between an inwardly folded basic position beneath a seating surface of the seat part and an outwardly folded position of use, wherein the footrest arrangement comprises a frame and a foot part pivotable relative to the frame, and wherein an adjustment member variable in length by means of an actuating motor for pivoting the foot part is supported at a front cross strut fixed to a frame and is connected to a movable rear adjustment traverse.
