Abstract (en)
[origin: WO2016041829A1] The invention relates to a device (1) for dispensing a liquid (18) onto a substrate, comprising a reservoir (10) for the liquid (18), which reservoir is open on a distal end (2) and is closed on a proximal end (3), and an applicator head (20), arranged on the open end and having an application means which is secured to a protruding retaining element (22), a receptacle (38) for the retaining element (22) being provided in order to allow the applicator head (20) to be secured. The device also has a feed opening (44) for feeding liquid (18) from the reservoir to the application means.
