Abstract (en)

[origin: WO2016041630A1] The invention relates to a dual electrode (10) for measuring an electrocardiogram of the heart of a patient (1), comprising: a first electrode portion (11a) for placement on a first body site (E, S, RA, LA) of the patient (1); and a second electrode portion (11b) for placement on a second body site (E, S, RA, LA) of the patient (1) which is different from the first body site (E, S, RA, LA); the first electrode portion (11a) and the second electrode portion (11b) being electrically separated from one another.
