Abstract (en)

[origin: WO2016020070A1] The invention relates to a mutant of an antistasin type serine proteinase (NE) inhibitor wherein said mutant is mutated with respect to the wild-type sequence at the amino acid residue immediately following the sixth cysteine residue. Such an antistasin type serine proteinase (NE) inhibitor is preferably selected from fahsin, guamerin, piguamerin, hirustasin and bdellastasin and mutant homologs.
