Abstract (en)

[origin: WO2016042074A1] The invention relates to a door system (20) for a vehicle (42) of a public transport vehicle comprising at least one door opening (44) and a door closing the door opening (44). Said door system is characterized by a sensor unit (26) which scans a passenger compartment in a three-dimensional contactless manner, in the region of the door opening (44). The invention also relates to a method for monitoring and controlling said type of door system (20).
