Abstract (en)  
[origin: WO2016030599A1] The present invention relates to a loading tray device (1) having a movable floor comprising a frame that receives a juxtaposition of at least one first (2) blade and one second (3) blade that are mounted so as to be movable in longitudinal translation, each blade (2, 3) consisting of a lower beam (4) and a covering plate (7) attached to the upper edges (8, 9) of side walls (5, 6), said first (5) and second (6) walls respectively comprising a first (10) flange and a second (11) flange that extend laterally to and outside of said beam (4), said second wall (6) of each blade (2, 3) having a height that is less than that of said first wall (5) by the thickness of the first flange (10), such that said first flange (10) of said second blade (3) abuts said second flange (11) of said first blade (2).
