Abstract (en)

[origin: WO2016040978A2] The invention relates to a rescue cage (4) for a hoisting rescue vehicle (1) having a turntable ladder (3). Said rescue cage (4) comprises a cage base (5), a cage barrier (6), and at least one column-type support element (7) that projects from the cage base (5) and is located in the outer peripheral region of the cage base (5). A first receiving device (15) is arranged or formed on the cage base (5), in the area of the support element (7). On the side facing the cage base (5), the support element (7) includes a first connecting element (16) that is connected to the first receiving device (15) in such a way as to be detachable as required. The invention further relates to a hoisting rescue vehicle (1) equipped with a rescue cage (4) of said type as well as to a person holding unit.
