Abstract (en)  
[origin: WO2016042130A1] The invention relates to a portion for use in the treatment of textiles, comprising at least two chambers which have walls consisting of a water-soluble material, a) at least one of these chambers containing a liquid composition that contains a total amount of - 25 to 60 wt. % of at least one anionic surfactant and - 2 to 35 wt.% of at least one non-ionic surfactant, each relating to the total weight of the liquid composition, and b) at least one other of these chambers containing a solid composition that contains a total amount of - 25 to 55 wt.% of at least one peroxide compound, - 2 to 25 wt.% of at least one organic bleach activator, and - 0 to 5 wt.% of surfactant, each relating to the total weight of said solid composition. Despite the high amount of solid peroxide compound and solid organic bleach activator, said portion causes no local damage to the textile during metering into the washing drum.
