Abstract (en)

[origin: WO2016042129A1] The invention relates to a solid composition for use in the treatment of textiles, containing respectively with respect to the total weight of the solid composition, a respective total amount of 25 - 65 wt.-% of at least one peroxide compound, 10 - 20 wt.-% of at least one organic bleaching activator, 5 - 20 wt.-% alkali metal silicate, 1 - 15 wt.-% of at least one polysaccharide, 0 - 5 wt.-% surfactant. Said solid composition is enveloped in a water-soluble material in order to obtain storage-stable single use portions together with liquid surfactant-containing compositions. The claimed solid composition can be used as an additive in conventional textile treatment agents.
